

***Team Meeting Report 3***  
***27/02/2019 2:00 pm – 3:00 pm***  
***Writer: Suleyman Yildirim***

**Decided:**

- We are going to focus on working with GPUs and creating the GUI while the existing code is being improved.

**Discussed:**

- How are we going to create a GUI? How is it going to be like? (Information about detected droplets like diameter so on)
- GUI should be user-friendly. The user can import images from a directory.
- How to improve the code? (Change with a better classifier, finding the arcs)

**Group Members Interests:**

Geoffroy: GUI, Improving the code

Patricia: GUI, GPU

Anwar: Improving the code, GPU

Suleyman: GPU, Improving the code

**If needed:**

We can settle a meeting to understand how the whole code is working.

**Plan for tomorrow meeting :**

A meeting settled at 10:30 am for preparation for the presentation.

**Plans for further meetings:**

Organising the next meetings for the next 6 week.

How are we going to keep the agenda? (Using Gantt Chart or Documents? )
